Memorandum No. 1078

To: Board of Directors

From: General Manager, Daniel Cozad

Date: February 8, 2012

Subject: Budget for Groundwater Enterprise for 2012-2013

RECOMMENDATION

Staff recommends the Board provide feedback on the draft budget for the Groundwater Enterprise. Staff further recommends the Board direct Staff to work with Groundwater partners to solicit feedback and utilize the feedback to develop the Groundwater Change proposal for 2012-2013.

BACKGROUND

Based on the Enterprise Policy and amended budget approved in January 2012, Staff is preparing the draft Groundwater Enterprise budget. This budget will be aggregated with the other three District enterprises to develop the complete District budget for approval in May 2012. The Engineering Investigation and the budget are companion documents and along with 2011 calendar year production, form the basis of the District groundwater changes. These rates are set in April, 2012 for groundwater extracted from July, 2012 to June, 2013.

DISCUSSION

The Groundwater Enterprise budget is based on the projected full costs of groundwater field operations, repairs/ regular maintenance, reporting and management for the Fiscal Year. Non-Annual Maintenance and Capital improvements are budgeted separately because they are variable from year to year and can be accelerated or deferred and are budgeted on a 3 year cycle. Capital and non-annual work was deferred before 2011 and with the exception of basin cleaning some deferred maintenance costs will continue in this and future budgets. Additionally, the development of reserves to offset spikes in cost due to increased maintenance and decreased pumping in wet years must be developed over time to reduce the impacts the budgets of the agencies and companies paying the charge.

The Groundwater Enterprise revenue is made up of three components:

- 1. Groundwater charge paid on the extraction of water from the basin
- 2. Reimbursement for recharging water under agreements with SBVMWD
- 3. Operating transfers from other enterprises

Like the prior year, the budget approach directed Staff to:

- Review the budget with the Admin Committee before submitting to the Board for approval
- The Groundwater Enterprise budget is the basis of the proposed groundwater charge
- Review and discuss the budget and groundwater charge with the groundwater partners

The budget approach and the following assumptions are used as the basis for the 2012-13 budget:

Revenue

- Groundwater revenue based on projected production from EI and prior year production
- Actual costs and overhead

Expenses

- Expenses will be estimated on the 2011-12 zero basis from actual costs and overhead
- COLA increases based on Bureau of Labor Statistics CPI-U at 3% http://bls.gov/cpi/cpid1112.pdf
- Salary forecast includes raise pool at 5% of total salaries
- Health and other Benefits at actual or providers forecast
- Utilities, fuel and electricity increase at 10% based on sector CPI
- Miscellaneous expense increase (no other basis available) 3%

New costs

Based on the direction from the Board, the preliminary budget for the Groundwater enterprise is presented in two expense components and two revenue components:

Field Operations, Maintenance, Reporting and Management \$786,224 Non-Annual Maintenance and Improvements over three years \$90,000 \$30,000 in 2012-13

Preliminary Estimate of Revenue from Groundwater charge for 2011-2012	\$ 619,880
Preliminary Estimate of Revenue from Reimbursement (historical average)	\$ 70,000
Total	\$ 689,880

The existing estimated revenue projects the Groundwater Enterprise will have an operating deficit of \$51,000 without a change in rates. Accordingly staff will propose adjusting rates for the groundwater charge to limit the use of reserves.

FISCAL IMPACT

The development of the budget itself does not have a fiscal impact however the development of a balanced budget is critical to the ongoing financial health of the District. Budget alternatives are shown that balance the budget to various levels. A primary goal for the budget is to eliminate the use of District reserves by recovering all cost in each enterprise and funding enterprise reserves so that they minimize future costs. The detailed Draft Budget for Groundwater Enterprise will be supplied separately and as a handout at the meeting.

- 1. Water Conservation All flows, approximately 30 CFS, in the Santa Ana are being utilized for direct use, approximately 700 AF has been recharged to date. No State Project Water is being recharged. Mill Creek flows vary with rainfall and are currently at 20-25 CFS, most all is being used directly, approximately 2400 AF recharged. In January field staff worked to construct improvements to Dike D.
